Live Long option: Under this Plan Option, in case death of the Life Insured during the policy term while the policy is in-force, Death Benefit is payable, and the policy will terminate.

This Plan Option also offers Income Pay-outs which commences on attainment of Income Pay-out Commencement age as chosen by You, provided all premiums have been paid and the policy is in-force. At Inception, you have to choose the Income Pay-out Start Age (60 or 65-years), Income Pay-out % options (as mentioned in the table below) and Income Pay-out mode. The Income Pay-outs that will be paid is equal to the Income Pay-out % multiplied by the Base Sum Assured. Income Pay-outs will be payable in arrears and the frequency of the pay-outs will be as per the Income Pay-out mode chosen. The Income Pay-outs will be continued to be paid till the date of death of the Life Insured or till the Maturity Date, whichever is earlier. In case of survival till the end of the policy term, Sum Assured on Maturity will be payable, and policy will terminate without any further benefit.

- The above example is of a non-smoker, with UW status as medical, sales channel as Individual Insurance Agent.
- The premiums illustrated are excluding any applicable taxes

Additional Benefits: In addition to the Plan Options, you can choose to add the Additional Benefits as described in detail below. These benefits can be chosen at inception only and will be subject to board approved underwriting policy.

Child's Future Protect Benefit: Under this Additional Benefit, you have an option to increase your life cover by choosing an Additional Sum Assured (10% to 100% of Base Sum Assured, in multiples of 10%). This option has to be selected only at the inception of the policy and only if you have a child between age 0 year to 18 years (age last birthday). The additional life cover under Child's Future Protect Benefit will be available only during the Child Coverage Term, which is equal to '25 minus Child's Age (age last birthday) at the inception of the Policy'. For example, if the Child's Age at the inception of the Policy is 10 year (age last birthday) and the Policy Term under the Plan Option is 40 years, the Child Coverage Term will be 15 years.

This Additional Benefit can be opted subject to meeting the following criteria:

- The maximum entry age of the Life Insured is 50 years (age last birthday)
- The Child Coverage Term should be at least 10 year lower than the Policy Term

In case the Child Coverage Term is lower than the Premium Payment Term of the base Plan Option, premiums towards Child's Future Protect Benefit will be payable only till end of child coverage term. In such cases, after the Child Coverage Term has expired, the premium towards base Plan Option and other Additional Benefit, if opted will continue for remaining Premium Payment Term.

In case death of the Life Insured during the Child Coverage Term, the Death Benefit which includes Additional Sum Assured towards Child's Future Protect Benefit, will be payable and the policy will terminate without any further benefit

This benefit can be availed by paying an additional premium which will be based on the additional sum assured chosen at inception, Child Coverage Term, Premium Paying Term and Premium Payment Frequency. Based on these selections, age at entry, gender, tobacco/non-tobacco user status and underwriting status (medical/non-medical) the additional premium will be determined.

Once selected you cannot opt out of this Additional Benefit at any time during the remaining Child Coverage Term. In case of unfortunate death of the child during the Child Benefit Coverage Term, the additional life cover towards Child's Future Protect Benefit will continue for the remaining Child Coverage Term as determined at inception of the policy.
