Benefits in detail:This product provides two Plan Options to choose from. These options help you customize the plan according to your individual needs. Your benefits will vary depending upon the following option chosen:

## 1. Flexible Income

## 2. Large Income

Plan Option 1: Flexible Income A regular stream of income called 'Income Benefit Pay-out' starting from the chosen policy year called 'Income Start Point' will be payable in arrears at the chosen Income Benefit Pay-out frequency till maturity or death of the Life Insured, whichever is earlier, while the policy is in-force. 'Income Duration' is the number of policy years for which 'Income Benefit Pay-out' is payable. The Income Benefit Pay-out will be paid in the following manner:

- In case 'Income Start Point' is after Premium Paying Term (PPT), then level 'Income

Benefit Pay-out' will be paid

- In case 'Income Start Point' is before than the Premium Paying Term (PPT), the amount of 'Income Benefit Pay-out' paid after PPT will be two times of the amount of 'Income Benefit Pay-out' paid prior to completion of PPT

The Income Duration options available in the plan option are 10 years, 15 years, 20 years, 25 years, 30 years and 35 years
The available Income Start Point and minimum Income Duration for each PPT is as per the table below:

## With Lump Sum

| PPT | Income Start Point | Minimum Income Duration |
| :---: | :---: | :---: |
| 5 | $5, \mathrm{PPT}+1, \mathrm{PPT}+2, \mathrm{PPT}+3, \mathrm{PPT}+10$ | 15 years |
| $8,10,12$ | $2,5, \mathrm{PPT}+1, \mathrm{PPT}+2, \mathrm{PPT}+3, \mathrm{PPT}+10$ | 15 years for Income Start Point 2, |
| 10 years for other Income Start Points |  |  |

Without Lump Sum

| PPT | Income Start Point | Minimum Income Duration |
| :---: | :---: | :---: |
| 5 | 5, PPT+1, PPT+2, PPT+3, PPT+10 | 15 years |
| $8,10,12$ | 2,5, PPT+1, PPT+2, PPT+3, PPT+10 | 20 years for Income Start Point 2, <br>  <br> 10 years for other Income Start Points |

The Policy Term (PT) is the policy year in which the last Income Benefit Pay-out and Maturity Benefit, if any, is payable. E.g. As per the options selected by the policyholder, if the last Income Benefit Pay-out/Maturity Benefit is in the $40^{\text {th }}$ policy year, then the policy term for the policy would be 40 years.

## Death Benefit:

On death of the Life Insured during the policy term while the policy is in-force, Death Benefit equal to Sum Assured on Death is payable and the policy will terminate.
The Sum Assured on Death at any point of time, provided the policy is in-force is highest of:

1. 10 times the Annualized Premium ${ }^{1}$
2. Any absolute amount assured to be paid on death
3. 10 times the Annual Premium²

Absolute Amount Assured to be paid on Death is as defined below:

- If neither of Family Income Benefits options is selected: Absolute Amount Assured to be paid on Death any time during the policy year will be calculated as below:
$\sum$ (Remaining Income Benefit Pay-outs multiplied by DB Factor corresponding to the respective Income Benefit Pay-out) plus (Sum Assured on Maturity, if applicable, multiplied by applicable DB Factor)

Please refer to Annexure I for DB Factor.

- If Family Income Benefit on Critical Illness and Death/Family Income Benefit on Death is selected: Absolute Amount Assured to be paid on Death is Nil
The Death Benefit ${ }^{4}$ during the entire policy term will not be less than $105 \%$ of Total Premiums Paid ${ }^{3}$ upto date of death.
${ }^{1}$ Annualized Premium shall be the premium amount payable in a year chosen by the policyholder, excluding the taxes, rider premiums, underwriting extra premiums and loadings for modal premiums, if any.
${ }^{2}$ Annual Premium shall be the premium payable in a year chosen by the policyholder, including loadings for modal premiums and the underwriting extra premiums, if any but excluding the taxes, rider premiums, if any.
${ }^{3}$ Total Premiums Paid means total of all the premiums received, excluding any extra premium, any rider premium and taxes.
${ }^{4}$ Death Benefit would be reduced to the extent of unpaid premiums in the Policy Year when death occurs.
Maturity Benefit: You have the option to add Lump Sum benefit under this plan option in addition to the Income Benefit Pay-out. If the Lump Sum benefit is opted, Sum Assured on Maturity which is equal to 'Maximum of (10, PPT) times the Annualized Premium' will be payable on the maturity of the policy if the Life Insured survives till the end of the policy term. The Lump Sum benefit option has to be chosen only at inception of the policy and once opted cannot be changed during the policy term. The amount of Income Benefit Pay-out will depend on whether You have opted for the Lump Sum benefit or not.
Income Benefit Pay-out Frequency: The Income Benefit Pay-out Frequency has to be chosen at inception of the policy. Once chosen, the Income Benefit Pay-out Frequency cannot be changed during the policy term. The various Income Benefit Pay-out frequencies available and corresponding multiplier factors to be applied on the Annual Income Benefit Pay-out to arrive at the Income Benefit Pay-out instalment is provided in the table below:

| Income <br> Frequency Benefit Payout | Multiplier Factor | Annual <br> Equivalent rate* |
| :--- | :---: | :---: |
| Yearly | $100.00 \%$ | $100 \%$ |
| Half-yearly | $49.00 \%$ | $98 \%$ |
| Quarterly | $24.25 \%$ | $97 \%$ |
| Monthly | $8.00 \%$ | $96 \%$ |

Modal instalment pay-out amount for Income Benefit Pay-out is calculated as the annual Income Benefit Pay-out amount as per the rate table multiplied by the above Multiplier Factor.

The Income Benefit Pay-out start date will depend on the Income Benefit Pay-out Frequency. For example, if you have opted for plan option Flexible Income, PPT of 10 years and Income Start Point $13^{\text {th }}$ policy year, the Income Benefit Pay-out will start from the end of the $1^{\text {st }}$ month, $3^{\text {rd }}$ month, 6th month or $12^{\text {th }}$ month (for Income Benefit Pay-out Frequency monthly, quarterly, half-yearly and yearly respectively) of the $13^{\text {th }}$ policy year.

2. Increasing Income - Under this plan option the first Income Benefit Pay-out is at the $10^{\text {th }}$ policy year/ $15^{\text {th }}$ policy year depending on the PPT chosen by You. The Income Benefit Pay-out will increase progressively from the second instalment onwards and the amount of Income Benefit Pay-out will be determined as first Income Benefit Pay-out multiplied by a factor, as mentioned in the table below:

## Policy Loan

A life insurance policy should be handy for you in case of any adverse financial emergencies and this plan caters to that, whereby you can avail a loan under the policy once the policy acquires surrender value.
The maximum loan amount you may avail is a specific percentage of Surrender Value applicable under the Policy when a request for a loan is received less any outstanding Policy Loan plus accumulated/accrued interest, if any, on that date. The specific percentage is as mentioned below:
Without Family Income Benefit: 60\%
With Family Income Benefit: 50\%
If a loan is granted by us under the policy, then:
(1) Interest will be charged on the outstanding loan amount at a rate declared by us from time to time based on then prevailing market conditions and will be equal to Three year (tenure) SBI MCLR $+0.50 \%$ subject to floor of $7.00 \%$. The rate of interest for policy loan as on October 2021 is $7.80 \%$ per annum. The interest on loan will be calculated on annual compounding basis. The interest rate methodology is reviewable with prior approval from IRDA of India. We will review the interest rate at least once a year and if the interest rate is revised, the same interest rate will be applied to both existing and new loan from the date of revision.
(2) For in-force and fully Paid-up policies: Policy can't be foreclosed on the ground of outstanding loan amount including interest exceeds the Surrender Value. For other than In-force and fully paid-up policies, if at any point of time outstanding loan amount and accumulated interest balance equal or exceed Surrender Value, then the Policy shall be terminated without value. Prior to this, we will notify you when your outstanding loan balance is $95 \%$ of the Surrender Value and will give an opportunity to repay all or part of the loan balance.
(3) Any benefit payable by us on the death of the Life Insured or on applicable Policy Anniversaries as Income Benefit or on the surrender of the policy or on the Maturity of the policy will first be reduced by any outstanding policy loan and accumulated interests, if any.

## Non-forfeiture Benefits

It is recommended that you pay all premiums for the period selected to be able to enjoy all policy benefits. However, at any stage if you stop paying premiums the following shall be applicable:
